

The socioeconomic impact of addiction and substance abuse is creating a healthcare crisis and it is making the role of nurses grow increasingly complex. Our CE content can increase their knowledge of trends in the epidemiology of substance use disorders and the effect of these trends on the delivery of high-quality patient care.

Drug abuse and addiction cost American society more than **\$740 billion** annually in lost workplace productivity, healthcare expenses, and crime-related costs.

Elite Healthcare has developed in depth curriculum to provide nursing professionals with:

- A comprehensive overview of substance use disorders and the addiction process.
- Knowledge and skills necessary to comprehensively assess and care for patients with substance use disorders
- The epidemiology and prevalence of these disorders
- Evidence-based strategies to prevent and treat substance use problems
- Resources to further develop professional skills in providing care for patients with substance use disorders.

Our courses on addiction and mental health are extensively used in addiction treatment facilities and acute care hospitals and state hospital systems to train RNs on best practices and help them improve patient care.
